

DEFAULT MODE NETWORK

Default Mode Network

(DMN)

PLANNING + ORGANIZATION

MIND WANDERING

SELF-REFERENTIAL THOUGHTS

RUMINATION

ONLY ONE NETWORK CAN BE ACTIVE AT ANY ONE TIME

Task Positive Network

(TPN)

ATTENTION-DEMANDING TASKS

PRESENT MOMENT AWARENESS

NO RUMINATION

ATTENTION TO BREATH,
SOUNDS, SENSATIONS

HELPFUL FOR BEING IN THE
HERE AND NOW

When the TPN is activated and we are in the present, there is no rumination, no worry, no past and no future, because the DMN is deactivated

THE MORE YOU PRACTICE
MINDFULNESS, THE EASIER IT IS
TO ACTIVATE TPN AND
DEACTIVATE DMN

GROUNDING FOCUS CALM BALANCE

HELPFUL FOR
PLANNING AND
ORGANIZING,
HOWEVER, WE
NEED TO BE
CAREFUL

OVERACTIVE
DMN CAN LEAD TO

over-activation
of the amygdala
(the alarm system
connected to
fight or flight)
= STRESS!

which can lead to

**ANXIETY
DEPRESSION**

(always thinking about
future or past, while largely
ignoring the present)

fun fact:
experienced
meditators have
smaller amygdalas
